Item 2.02 Results of Operations and Financial Condition.

On February 3, 2023, Immunovant, Inc., or the Company, issued a press release announcing its financial results for its fiscal third quarter and nine months ended December 31, 2022. A copy of the press release is furnished as Exhibit 99.1 to this Current Report on Form 8-K and is incorporated herein by reference.

The information contained in this Item 2.02, including Exhibit 99.1, shall not be deemed "filed" for purposes of Section 18 of the Securities Exchange Act of 1934, as amended, or subject to the liabilities of that section or Sections 11 and 12(a)(2) of the Securities Act of 1933, as amended. The information in this Current Report shall not be incorporated by reference in any filing with the U.S. Securities and Exchange Commission made by the Company, whether made before or after the date hereof, regardless of any general incorporation language in such filling.

Item 9.01 Financial Statements and Exhibits.

Date: February 3, 2023

Immunovant Reports Financial Results and Recent Business Updates for the Quarter Ended December 31, 2022

- A Phase 1 clinical trial of IMVT-1402 is on track to be initiated in early calendar year 2023
- A Phase 3 clinical trial of batoclimab in thyroid eye disease (TED) and a Phase 2b clinical trial in chronic inflammatory demyelinating polyneuropathy (CIDP) were initiated, as expected
- Phase 3 clinical trial of batoclimab in myasthenia gravis (MG) is ongoing
- Cash balance of approximately \$433 million as of December 31, 2022

NEW YORK, February 3, 2023 – Immunovant, Inc. (Nasdaq: IMVT) a clinical-stage biopharmaceutical company committed to enabling normal lives for people with autoimmune diseases, today reported recent company updates and financial results for its fiscal third quarter ended December 31, 2022.

"We entered 2023 with renewed enthusiasm, energized by our clinical development progress and our goal to provide potentially best-in-class anti-FcRn therapies for people with autoimmune disorders," said Pete Salzmann, M.D., chief executive officer at Immunovant. "With an expected cadence of multiple data readouts beginning mid-2023, we believe we are poised for a transformative year for the class."

Recent Clinical Development Updates:

IMVT-1402:

Immunovant plans to initiate a Phase 1 clinical trial of IMVT-1402 in early calendar year 2023, contingent on clearance of its IND application, with initial data readout from this trial expected in mid-calendar year 2023.

Batoclimab:

A Phase 3 clinical trial in TED was initiated, with topline results from the TED program (consisting of two Phase 3 clinical trials) expected in the first half of calendar year 2025.

A pivotal Phase 2b clinical trial in CIDP was initiated, with initial results from period 1 expected in the first half of calendar year 2024.

As previously disclosed, Immunovant expects to have initial results from a Phase 2 clinical trial in Graves' disease in the second half of calendar year 2023, and expects to have top-line results from the MG clinical trial in the second half of calendar year 2024.

Based on strategic portfolio considerations, Immunovant has decided to preserve warm autoimmune hemolytic anemia (WAIHA) as a potential indication for IMVT-1402 and not pursue a WAIHA indication for batoclimab.

Financial Highlights for Fiscal Third Quarter Ended December 31, 2022:

Cash Position: As of December 31, 2022, Immunovant's cash and cash equivalents totaled \$432.6 million, which is expected to fund operations into the second half of calendar year 2025.

R&D Expenses: Research and development expenses were \$42.3 million for the three months ended December 31, 2022, compared to \$29.8 million for the three months ended December 31, 2021. The increase was primarily due to increased personnel-related expenses, costs related to the research and development of IMVT-1402, and higher batoclimab program-specific research and development costs (including contract manufacturing costs). These increases were partially offset by lower cross-indication clinical studies and clinical research costs.

IPR&D Expenses: Acquired in-process research and development expenses were \$10.0 million for the three months ended December 31, 2022, related to the achievement of a development and regulatory milestone for batoclimab in MG as specified in the HanAll agreement. There were no acquired in-process research and development expenses for the three months ended December 31, 2021.

G&A Expenses: General and administrative expenses were \$11.8 million for the three months ended December 31, 2022, compared to \$11.5 million for the three months ended December 31, 2021. The increase was primarily due to higher personnel-related expenses and information technology costs, partially offset by lower financial advisory, legal and other professional fees.

Net Loss: Net loss was \$63.2 million (\$0.49 per common share) for the three months ended December 31, 2022, compared to \$41.4 million (\$0.36 per common share) for the three months ended December 31, 2021. Net loss for the three months ended December 31, 2022 and 2021 included \$8.9 million and \$10.2 million, respectively, related to non-cash stock-based compensation expense.

Common Stock: As of December 31, 2022, there were 129,260,254 shares of common stock issued and outstanding.

Financial Highlights for Fiscal Nine Months Ended December 31, 2022:

R&D Expenses: Research and development expenses were \$108.4 million for the nine months ended December 31, 2022, compared to \$69.8 million for the nine months ended December 31, 2021. The increase was primarily due to increased personnel-related expenses, costs related to the research and development of IMVT-1402, and higher batoclimab program-specific research and development costs (including contract manufacturing costs).

IPR&D Expenses: Acquired in-process research and development expenses were \$10.0 million for the nine months ended December 31, 2022, related to the achievement of a development and regulatory milestone for batoclimab in MG as specified in the HanAll agreement. There were no acquired in-process research and development expenses for the nine months ended December 31, 2021.

G&A Expenses: General and administrative expenses were \$35.6 million for the nine months ended December 31, 2022, compared to \$39.0 million for the nine months ended December 31, 2021. The decrease was primarily due to lower financial advisory, legal, and other professional fees, partially offset by higher personnel-related expenses and information technology costs.

Net Loss: Net loss was \$151.5 million (\$1.26 per common share) for the nine months ended December 31, 2022, compared to \$109.6 million (\$1.02 per common share) for the nine months ended December 31, 2021. Net loss for the nine months ended December 31, 2022 and 2021 included \$24.8 million and \$22.4 million, respectively, related to non-cash stock-based compensation expense.

About Immunovant, Inc.

Immunovant, Inc. is a clinical-stage biopharmaceutical company dedicated to enabling normal lives for people with autoimmune diseases. As a leader in FcRn inhibitor technology, the Company is boldly developing innovative therapies for a range of debilitating autoimmune diseases with significant unmet patient needs. For additional information on the Company, please visit www.immunovant.com.

Forward-Looking Statements

This press release contains forward-looking statements for the purposes of the safe harbor provisions under The Private Securities Litigation Reform Act of 1995 and other federal securities laws. The use of words such as "can," "may," "might," "will," "would," "should," "expect," "believe," "estimate," "design," "plan," "intend," and other similar expressions are intended to identify forward-looking statements. Such forward looking statements include Immunovant's expectations regarding the timing, design and results of clinical trials of its product candidates and indication selections; Immunovant's plan to develop batoclimab and IMVT-1402 across a broad range of autoimmune indications; Immunovant's beliefs regarding its cash runway; and the potential benefits of batoclimab's and IMVT-1402's unique product attributes. All forward-looking statements are based on estimates and assumptions by Immunovant's management that, although Immunovant believes to be reasonable, are inherently uncertain. All forward-looking statements are subject to risks and uncertainties that may cause actual results to differ materially from those that Immunovant expected. Such risks and uncertainties include, among others: initial results or other preliminary analyses or results of early clinical trials may not be predictive final trial results or of the results of later clinical trials; results of animal studies may not be predictive of results in humans; the timing and availability of data from clinical trials; the timing of discussions with regulatory agencies, as well as regulatory submissions and potential approvals; the continued development of Immunovant's product candidates, including the timing of the commencement of additional clinical trials and resumption of current trials; Immunovant's scientific approach, clinical trial design, indication selection and general development progress; future clinical trials may not confirm any safety, potency or other product characteristics described or assumed in this press release; any product candidate that Immunovant develops may not progress through clinical development or receive required regulatory approvals within expected timelines or at all; Immunovant's product candidates may not be beneficial to patients, or even if approved by regulatory authorities, successfully commercialized; the potential impact of the ongoing COVID-19 pandemic, geopolitical tensions, and adverse macroeconomic conditions on Immunovant's clinical development plans and timelines; Immunovant's business is heavily dependent on the successful development, regulatory approval and commercialization of batoclimab and IMVT-1402; Immunovant is at an early stage in development of for IMVT-1402 and in various stages of clinical development for batoclimab; and Immunovant will require additional capital to fund its operations and advance batoclimab and IMVT-1402 through clinical development. These and other risks and uncertainties are more fully described in Immunovant's periodic and other reports filed with the Securities and Exchange Commission (SEC), including in the section titled "Risk Factors" in Immunovant's most recent Annual Report on Form 10-K, its Form 10-Q to be filed with the SEC on February 3, 2023, and Immunovant's subsequent filings with the SEC. Any forward-looking statement speaks only as of the date on which it was made. Immunovant undertakes no obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future events or otherwise.
